# See society through social media

The University of Hong Kong  
Department of Sociology

# Welcome to the course!

- What are the aims of the project?
- Objectives: what will we be doing?
- How this project be useful for me?
- Project plan

# Meet the team

**Tom McDonald**

A university teacher who researches social media in China

**Laura Pountney**

A sociology teacher at a Sixth Form college in the UK

**Candy Hiu Wa Chan**

A liberal studies teacher at a secondary school in Hong Kong

**Laura Haapio-Kirk**

A research assistant on the Why We Post project

# What are the aims of the project?

- To improve your knowledge and exam skills
- To explore a major research project which has links to a number of areas of your course
- To strengthen your understanding of research methods
- To understand the impact of social media around the world
- To interact with students in Hong Kong to explore the role of social media there and here

# Objectives: What will we be doing?

- Learning and applying key sociological concepts and theories, checking your knowledge
- Using short films and online activities to explore the research and findings
- Working individually and in groups to carry out your own small scale research
- Creating online storyboards
- Visiting speaker/meeting a researcher

Improving your conceptual  
and theoretical knowledge

Learning how research is  
done, meeting researchers

## How will this project be useful for me?

Connecting with  
students in Hong Kong

Exploring academic texts

Practicing exam skills

# Plan

- Defining social media

- Researching new social media: the methodology of Why We Post

- What are the key findings of the research?

- How can you apply these findings in your exams?

- Knowledge exchange with Hong Kong students

- **Conclusions: What have we learnt?**

# Activity: p3

- In your own words, in pairs discuss what 'new social media' means
- Write a definition
- What are the problems with trying to define social media?
- Share your definition with the pair next to you - is yours the same as theirs?

# Definition

## Social Media

New forms of shared information which involve different types of communication, based on new forms of technology

# Definition

# Social Media

New forms of shared information which involve different types of communication, based on new forms of technology

## What is social media?

[https://www.youtube.com/watch?v=627Ksat\\_Csk](https://www.youtube.com/watch?v=627Ksat_Csk)

# How are different types of social media used to communicate? p3

- Using the images on p3, make notes on the ways you think others (or yourself) use different platforms
- Think about who you use each platform to communicate with, friends or family or work colleagues?
- Why?

# How do we research social media?

Imagine that you have been given a large sum of money to carry out research into the impact of social media. Using your knowledge of sociological research methods knowledge, answer the following questions

- Which methods would be most suitable and why?
- How is researching social media different to studying other areas of social life?
- Who would you wish to research as part of your sample and why?
- What sorts of skills might your research team need?
- Where would you base your research and why? (online/offline)
- What are the practical, ethical and theoretical issues with your research?
- How would you record your results?
- How would you present your findings and why?
- Who might the results be useful for and why?
- Could your results be used to create social policy? If so, how?
- What have you learnt from this activity about the challenges and possibilities of researching the impact of social media?

# Prompt sheet

confidentiality

tative

# Why We Post

- Use worksheet p7 to record your research about the research project
- Be ready to feedback to the rest of the group
- The following slides will help if you are learning about the project as a class

[www.ucl.ac.uk/why-we-post](http://www.ucl.ac.uk/why-we-post)

# Global Social Media and Global Social Anthropology

Global  
Social Media  
Impact Study

European Research Council  
Established by the European Commission  
**Supporting top researchers  
from anywhere in the world**

<https://youtu.be/kDZy4LZQSNI>

# Research methods used

- Watch the following clips and make notes
  - What did you learn about the way the research was organised and changed?

# Research methods used

<https://www.youtube.com/watch?v=hzdjDWrAXuM>

Watch this clip and make notes - what did you learn about the way the research was organised and changed?

[https://www.youtube.com/watch?v=9\\_cYs82XQy4](https://www.youtube.com/watch?v=9_cYs82XQy4)

# Findings

- The results of the research are presented in a number of different formats
- Ethnographies (all free to [download](#))
- [Short films](#) (note the paintings and calligraphy also used here)
- Graphs
- Tables
- Stories
- Images

- What does this finding suggest about the impact of social media on equality/inequality?

In our Brazilian and Trinidadian fieldsites people often post photos of themselves in 'high class' settings such as at a gym or swimming pool, but this does not translate to enhanced social standing offline.

- How does this evidence challenge the view that social media leads to less people having less privacy?

**Cici (17, South China) first heard the word ‘privacy’ in a TV soap opera. To her, it sounded very fashionable and modern. In her dormitory four girls slept together in two beds. In the factory she shared a room with eight girls. “At night, everyone talks with their boyfriends on the phone, it’s as noisy as the food market...there are no secrets at all because you can always hear each other and see each other.” Cici started to message more on QQ rather than talking on the phone with her boyfriend. This was her first experience of the kind of privacy she had heard about on TV.**

- What is the role of social media in this context?
- How would feminists interpret this?

“Offline I am only allowed to spend time with my family and one childhood friend. Online I send up to 500 messages a day to my secret boyfriend and have friends all over Turkey and Europe.”  
- Zehra, 21 years old, Southeast Turkey.

- How does this finding challenge the idea that social media leads to a lack of privacy and more social relationships/ interaction?

## THE ENGLISH GOLDBLOCKS

The English use scalable sociality to make sure that their relationships are neither too hot or too cold. They like relationships best when they are sort of grey, like the weather.

**Among English school pupils there are three main genres of selfie.**

**The 'classic selfie'**

Highly stylised for the right 'look', often posted on Instagram.

**The 'groupie'**

On Facebook school pupils posted five times as many selfies showing friendship groups than individuals alone.

**The 'uglie'**

A favoured mode on Snapchat, the best way to take an ugie is point the phone upwards from below the chin.

I saw this and thought of you

This reminded me of you

### Good karma

In our south Indian fieldsite many people enhance their Karma with the good deed of sending positive or religious memes to their friends throughout the day.

You Be Lurking On My Page  
Cause You Miss Me But Thats  
None Of My Business...

### You be lurking

Roger (23) from Trinidad has a reputation to maintain as being cool and laid back. But recently he found out that his girlfriend cheated on him with a friend. Roger didn't want to reveal his feelings in front of everyone he knew and especially not on Facebook. But he knew his ex was checking his Facebook page so he shared this Kermit meme instead.

### Paradise

Every day Francisco (30), in Chile, posts multiple memes to his Facebook profile. One meme shows Eve explaining to Adam that since they don't have any clothes, food, or hospitals, they must be in that paradise called Chile. This is typical of the way Northern Chileans make fun of their own marginality as opposed to people in Santiago, the capital.

# Trinidad

# England

"When I broke up with my ex, I posted emotional status updates on my QQ. This way my ex could see how I was suffering, without talking directly to him. But at the same time my family could see everything and they got worried. That's why I moved my posts to Wechat, where my ex was but my family wasn't."

- Huang Ling, 19-year-old  
factory worker, South China

# Qualitative Discoveries

Website discoveries to be explored and noted on p10-14 of your pack

2. Survey results p15-23 of your pack

- Ethnographic accounts
- New Concepts

# Survey results (p15-23 of your pack)

- Explore each graph or table and think about the kinds of data each provides.
- Try to interpret each graph, what does it tell us about the impact of social media in each context and globally?
- Are there any patterns? Does your interpretation match other people around you?
- Try to use the concept grid p 15 to guide and inform your observations
- What can we learn from this activity?

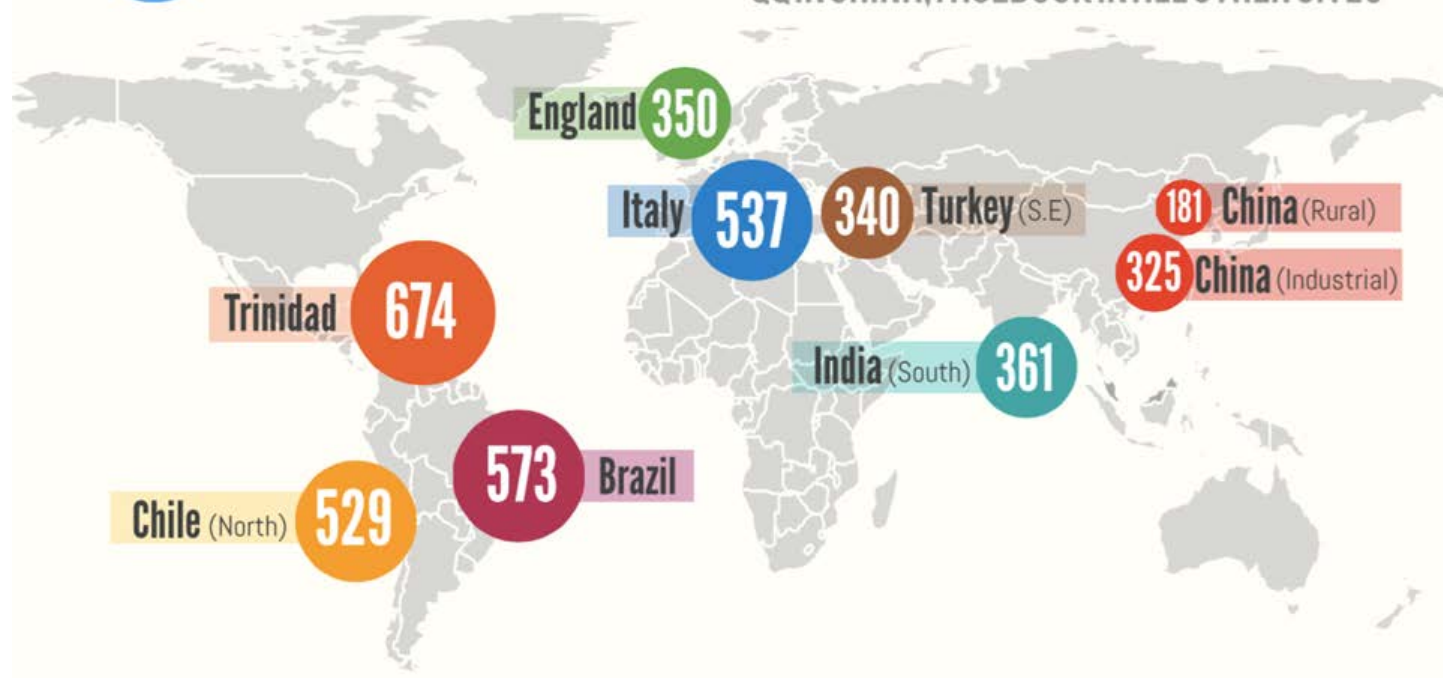

## AVERAGE NUMBER OF FRIENDS ON PRIMARY SOCIAL MEDIA

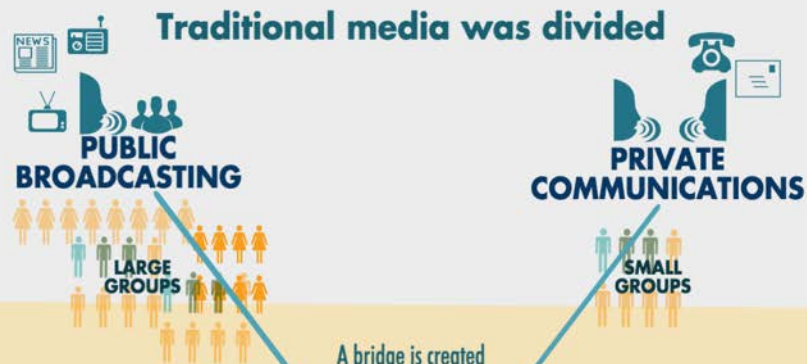

QQ IN CHINA, FACEBOOK IN ALL OTHER SITES

# Conceptual findings

- The following slides contain the main new concepts that arose from the research
- What do you think each concept is and what do they mean?

A bridge is created between public and private media with the rise of

**[SOCIAL MEDIA]**

=

**[SCALABLE SOCIALITY]**

**Social media has created a new type of media sociality**

**We can now easily scale from:**  
the most private to the most public  
the smallest group to the largest group

[Polymedia: the idea that no social platform can be understood without first understanding the others that exist alongside it]

# Polymedia

# Content migration

In both England and Trinidad we found that negative banter and arguments between school children migrated from the playground to BBM, then to Twitter in England and Facebook in Trinidad.

## Memes

In our Brazilian and Indian fieldsites genres of content such as memes moved quickly from Orkut to Facebook, then to WhatsApp.

## PRESENCE ON SOCIAL MEDIA PLATFORMS FOR 11 TO 18 YEARS OLDS IN SCHOOL IN ENGLAND

SNAPCHAT

WHATSAPP

BBM

INSTAGRAM

FACEBOOK

TWITTER

Sample size=2,496

for 11-18 years old in schools in England

## INSTAGRAM

where pupils welcome strangers who can appreciate their images

## FACEBOOK

where pupils interact with other groups such as family, work colleagues, neighbours

## TWITTER

The main platform for school banter

## WHATSAPP

often class groups, usually one of single sex where can discuss the other sex, and another that includes both sexes

## SNAPCHAT

shared only amongst a few trusted friends

# Ethnographic evidence

- On p 24-30 you'll see a summary of the 15 month ethnographic research carried out by Tom McDonald
- Read the summary then answer the questions on p31-32

# Ethnography: Introduction
